# Rob Daraban

**t:** (908) 343-1550     **e:** darabandev@gmail.com     New York, NY     [Portfolio]     [Linkedin]     [GitHub]

## Skills

React.js, Redux, JavaScript, HTML5, CSS3, Express, Node.js, Python, Flask, jQuery, SQL, postgreSQL, SQLAlchemy, Sequelize.js, Heroku, Git, Bash, Agile Workflow, Pair Programming

## Projects

**Bit Flicks -** React.js | Redux | HTML5 | CSS3 | JavaScript | Express | Node.js | postgreSQL | Sequelize.js     [live site] | [github]
*Full stack web app built for cinema lovers to find, log, categorize, and review any films of their choosing*
- Implemented OMDb API to ensure users have access to any film they wish to research or interact with
- Engineered SQL database to start with minimal seed data and self-create rows based on results from API
- Fashioned custom React components to allow users to easily categorize films by adding them to user-created lists and being able to easily access and modify these lists via Redux dataflow

**Artizen -** React.js | Redux | HTML5 | CSS3 | JavaScript | Python | Flask | postgreSQL | SQLAlchemy     [live site] | [github]
*Platform to discover and share local street art with other citizens via route creation through a fully interactive map*
- Integrated Google Maps API with geocoding package to translate user-created addresses to location coordinates visible on an interactive map
- Granted users freedom in creating and sharing custom walking routes via Google Maps Directions service
- Orchestrated seamless UX by customizing map React component to route to individual artwork pages through simple mouse navigation

**Tap Sketch -** React.js | Redux | HTML5 | CSS3 | JavaScript | Python | Flask | postgreSQL | SQLAlchemy     [live site] | [github]
*Full stack web app promoting user created artwork via HTML Canvas and a suite of social media features*
- Tailored database schema to facilitate social media functionality such as following users, liking posts, and leaving comments
- Leveraged p5.js React package to give users ability to create their own drawings in-app via Canvas element
- Cultivated artistic ecosystem through an easily navigable UI efficiently displaying user created drawings

## Professional Experience

**Loan Processor**   |   February 2019 - September 2020
Temple View Capital - Austin, TX
- Closed an average of $5,000,000 in hard money mortgage loans each month by coordinating communication between clients, sellers, loan officers, title agents, and insurance agents to ensure smooth and timely closings
- Educated clients on loan programs, financing options, and paperwork necessary to qualify for loans
- Maintained and organized large sets of paperwork for underwriters to easily review information and quickly approve loans

**Data Migration Specialist**  |  August 2018 - February 2019
NBC News (Contract) - New York, NY
- Utilized multiple proprietary softwares to keep employee databases up to date and in sync
- Played key role in managing massive data migration to new platform
- Created basic web apps for use as reference materials and to assist with new hire training

## Education

**App Academy**   |   March 2021   |   New York, NY
Full time intensive software engineering course with focus on full stack web development

**Centenary University**  |  May 2013  |  Hackettstown, NJ
**School of Business,** B.S. of Business Administration, Concentration: Marketing
